1. A computer-implemented method of modifying an approximate volumetric representation of a three-dimensional object, the method comprising:
 - obtaining a line list of points of at least one set of lines having start and end points corresponding to intersection of the lines with object boundary positions, said sets of lines having components extending in three orthogonal directions;
 - producing a modified volumetric representation by modifying the approximate volumetric representation based on the start and end points of the set of lines and the approximate volumetric representation; and
 - displaying the modified volumetric representation.
